Additional identifiers

Study information

Scientific Title

Study objectives

1. Potential to improve stroke knowledge following the implementation of an individualised information booklet
2. Assessment of new information tool and stroke knowledge assessment tool

Ethics approval required
Old ethics approval format

Ethics approval(s)
Approval was obtained from the local Research Ethics Committee

Primary study design
Interventional

Study design
Randomised controlled feasibility trial

Study type(s)
Prevention

Health condition(s) or problem(s) studied
Stroke

Interventions
Individualised information booklets.

Intervention Type
Other

Phase
Not Applicable

Primary outcome(s)
Knowledge of stroke risk factors and secondary prevention.

Key secondary outcome(s)
1. Satisfaction with information given
2. Utilisation of CareFile
3. Blood pressure targets

Completion date
01/03/2001

Eligibility

Key inclusion criteria
1. Confirmed stroke
2. All ages

3. Either sex
4. Patients who are discharged home and who can self complete a questionnaire, or who have a named carer who can do so

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
All

Key exclusion criteria
1. Patients with pre-existing cognitive impairment
2. Patients who are discharged to institutionalised care
3. Patients who are discharged home and who cannot complete questionnaires and have no other named carer who can do so

Date of first enrolment
01/04/2000

Date of final enrolment
01/03/2001

Locations

Countries of recruitment
United Kingdom

England
