Additional identifiers

Study information

Scientific Title
Pilot study for the comparison of drug treatment with conservative treatment for people with overactive bladders

Acronym
Pilot for the URGENT trial

Study objectives
Not provided at time of registration.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration.

Primary study design
Interventional

Study design
Randomised controlled trial

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Urge urinary incontinence

Interventions
Anticholinergic drugs, bladder retraining, and their combination

Intervention Type
Other

Phase
Not Specified

Primary outcome(s)
Not provided at time of registration.

Key secondary outcome(s)
Not provided at time of registration.

Completion date
30/04/2001

Eligibility

Key inclusion criteria
Adult women with urge urinary incontinence and no contraindications for anticholinergic drugs

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Sex
Female

Total final enrolment
57

Key exclusion criteria
Does not meet inclusion criteria

Date of first enrolment
01/04/2000

Date of final enrolment
30/04/2001

Locations

Countries of recruitment
New Zealand
