

1. Participant Flow

2. Baseline Characteristics

All Subjects selected from patients currently undergoing Aspiration Therapy. Seven women and one man participated in the study.

	N	Mean	SD	P25	P50	P75
Age	8	52.9	7.3	48.0	50.5	58.5

3. Outcome Measures

Aspiration Time

Mean time for aspiration of 3 meals per subject (minutes)

	N	Mean (min)	SD	P25	P50	P75
6mm A-Tube	8	14.9	9.5	6.3	13.1	23.0
8mm A-Tube	8	9.6	6.3	5.0	6.6	14.4

Blockages during Aspiration

Mean number of blocked tube events during aspiration of 3 meals per subject

	N	Mean	SD	P25	P50	P75
6mm A-Tube	8	1.9	1.1	1.0	2.0	3.0
8mm A-Tube	8	0.038	0.106	0	0	0

4. Adverse Events

There were no adverse events associated with this trial.
