### **Child assent form: War Child evaluation**

We are doing a research activity on your education. We would like to get your agreement to answer our questions. The questions are about Mathematics and English, and others are about your wellbeing. These will be done individually with a research assistant. The score that you get will not affect you or your education in any way.

The questions will take about one hour in total. If you join a group discussion in the future, it will take maximum one hour. At the end of the school year, we will come back and ask you questions again.

It is your choice to join or not, and if you choose not to join it's not a problem. The activities are not dangerous and you can choose to stop them at any time.

You will not be given anything (like money or gifts) for joining but it is possible that these activities will help other children in the future.

A number will be used instead of your name so that no one can match you to your information. At a later time, we will have community meetings where we will talk about the research and you will be invited to come.

If you have any questions or have a bad experience, you can talk to anyone from the research team, your parent, or your teacher.

### **Statement of assent**

I understand the statements in the form. I had time to ask questions, and I received acceptable answers to all my questions. I agree to participate in the research study. No one has forced me to sign this form.

\_\_\_\_\_  
Child's name

\_\_\_\_\_  
Date

\_\_\_\_\_  
Signature/ X / Drawing / Stamp

### **Statement of staff member seeking assent:**

I confirm that the above child understands the purpose and process of the research activities. I also confirm that a parent/guardian has already given consent for the child to participate.
