

Participant information sheet

Our study consists of different phases with in total 4 slightly different surveys, each with a slightly different participant information sheet/letter. After this information sheet/letter, a consent form will be shown to the (potential) participant.

1) Participant information sheet: Diagnostic survey

Welcome to the National Vaccination Test!

We kindly ask you to participate in our scientific research. Participation is voluntary, however your permission is required to participate. This research study is being conducted by Amsterdam UMC.

Purpose of the investigation

By means of this research we would like to obtain more information about the view of the Dutch population on the flu and vaccinations.

What participating means

Participating means that you fill in the questionnaire and answer questions about your views on the flu and vaccinations. We would also like to ask you to participate if you are against vaccinations.

Your data will be anonymized during processing for the study.

The review committee of the METc of Amsterdam UMC has assessed that this research is no subject to the Medical Research Involving Human Subjects Act (WMO).

If you have any questions, please contact our researchers

2) Participant information sheet: Post-intervention survey

Welcome back to The National Vaccination Test!

You have already participated in our scientific research. We have made an information video based on your answers. We would like to ask you to view the information video and subsequently complete a short questionnaire (+5 min). Participation is voluntary, however your permission is required to participate.

This research study is being conducted by Amsterdam UMC.

Purpose of the investigation

By means of this research we would like to obtain more information about the view of the Dutch population on the flu and vaccinations.

What participating means

Participating means that you fill in the questionnaire and answer questions about, for instance, your view on the flu and vaccinations. We would also like to ask you to participate if you are against vaccinations. Your data will be anonymized during processing for the study.

The review committee of the METc of Amsterdam UMC has assessed that this research is no subject to the Medical Research Involving Human Subjects Act (WMO).

Consent form

After the participant information sheet, a 'consent form' will be shown, as depicted below:

Permission

1. I have read the information letter above.
2. I understand that participation is voluntary. I also know that I can decide to stop participation at any time. I don't have to give a reason.
3. I consent to the collection of data to be entered in the manner and for the purposes stated in the information letter.
4. I want to participate in this study.
