

RENAL-HF

FUNDED BY
NIHR | National Institute for
Health and Care Research

Co-creation of a care pathway for implementing personalised renal function monitoring and interventions for people with heart failure

**Are you a GP, pharmacist
(clinical/practice/Primary Care
Network) or a practice-based nurse?**

**Would you be willing to take part in an
interview to inform the development of
a technology informed care pathway to
improve kidney health in people with
heart failure?**

**We would like to speak to primary care staff about their
perspectives on optimising the treatment of heart
failure patients while preserving renal function**

Interviews will take no more than 60 minutes and can place via telephone/video or in-person. Participants will be compensated for their time. To request a study information sheet or for further details, please get in touch with our study researchers:
