

Project Title:

Localised mobile active case finding with Truenat molecular testing for the effective diagnosis of tuberculosis (LOCATE-TB) in Yogyakarta, Indonesia

Lead Researchers: Dr Rina Triasih (Universitas Gadjah Mada) & Dr Philipp du Cros (Burnet Institute)

Institutions involved: This research study is a part of a wider Tuberculosis Elimination program being conducted under the 'Zero TB Initiative Yogyakarta' (ZITBY), a collaborative program lead by the Universitas Gadjah Mada and Burnet Institute, in collaboration with the Yogyakarta government, Yogyakarta and Kulon Progo District Health Offices, the Yogyakarta Provincial Health Office and the Indonesian National TB program (NTP).

Telephone interview consent script

Hello, my name is {{INTERVIEWER NAME}} from the Zero TB Cities Project Yoyakarta. I am trying to speak to {{PARTICIPANT FIRST NAME AND LAST NAME}}.

Firstly, can I confirm that I am speaking to {{PARTICIPANT FIRST NAME AND LAST NAME}}. Can you tell me if you were recently screened for TB? And where were you screened?

You previously participated in our Truenat TB study when you (or your child) were recently screened and tested for TB using the Truenat TB test at our active case finding service. We are studying whether the Truenat TB test is suitable for use in mobile case finding services and can make it faster for people to get their results. We are now asking if you will volunteer to take part in a phone interview as part of this research.

Are you interested in taking part in a phone interview for this study?

[If “Yes”, proceed with the rest of the phone script. If “No”, thank the participant and end the call]

Before we interview you, I need to give you some information about the interview.

The interview will take approximately 30 minutes of your time and we will ask you about your experience (or your child’s experience) with the TB case finding service using the Truenat TB test to help us understand whether how we are using the test is suitable for patients. Your responses will be anonymous – meaning that your name or other identifying information will not be used when analysing the data and reporting the results.

Would you like me to tell you more about who is doing this study?

[If “Yes”, read the text in the box to the potential participant]

The study is being conducted by the Zero TB Cities Project Yoyakarta. This project is led by the Universitas Gadjah Mada in Indonesia and the Burnet Institute from Australia.
--

If you choose to participate and give us permission to do so, we would like to record the interview. Would you like more information about how the recording will be made, stored and used?

[If “Yes”, read the text in the box to the potential participant]

We will record the interview on the phone that I am calling you on. At the end of the interview we will remove the recording from the phone and transfer it to secure storage and remove any identifying information. We will transcribe the interview (make a written copy of what was said in the interview) from the recording and then delete the recording. The transcribing will be done within six weeks of the interview and will be done by the study team or a company that provides professional and confidential transcribing services.

If you choose to withdraw from the study during the interview we will delete the recording and it will not be used in the study.

If you choose to participate, we can transfer phone credits for {{AMOUNT TO BE DETERMINED}} to your phone as thanks for giving up your time to be interviewed.

Your participation in this interview is completely voluntary. This means that you do not have to participate if you do not want to. You can ask me any questions you have about the study before deciding whether to participate.

g

If you agree to participate, you do not have to answer any questions that you do not wish to. You can also end the interview at any time without telling us the reason and, when ending the interview, you can instruct us not to use your answers in the study.

The ethical aspects of this research have been approved by the Medical Health Research Ethics Committee at the Universitas Gadjah Mada and The Alfred Hospital Ethics Committee (in Australia).

Would you like me to tell you more about these approvals?

[If “Yes”, read the text in the box to the potential participant]

The ethical committee may review your research records, as they relate only to this study. These reviews would be done to check on the quality of the research. No one is allowed to share your private information with anyone else.

If you have questions, concerns or complaints about this research, you can contact the principal investigator, Dr Rina Triasih at the Universitas Gadjah Mada; or the Universitas Gadjah Mada ethics committee or the Alfred Ethics Committee. I will give you the contact details for Dr Rina Triasih and she can provide you the contact details for the ethics committees. Please make a note of her details in case you need them at any point:

- Email: rina.triasih@yahoo.com
- Phone Number: +62 813 9276 4269

If anything that is discussed in the interview makes you feel upset or uncomfortable and you would like support or help, I can provide you with details of services that can provide this to you.

What questions do you have about the study before deciding whether you want to participate?

Do you agree to voluntarily participate in this interview process?

Do you give permission for us to make a recording of the interview?

Participant Number:

Consent Form (Telephone In-depth Interview)

Study Title Localised mobile active case finding with Truenat molecular testing for the effective diagnosis of tuberculosis (LOCATE-TB) in Yogyakarta, Indonesia

Principal Investigators Dr. Rina Triasih, M. Med(Paed), Ph. D, Sp. A(K)
Dr Philipp du Cros (Burnet Institute)

Name of Participant (please print)	_____
Date	_____ _____

Declaration by Study team member / researcher[†]

I have given a verbal explanation of the research project, its procedures and risks using the study telephone script. I have given the participant the chance to ask questions and have answered these to the satisfaction of the participant. I have asked whether the participant gives permission for the interview to be recorded. I believe that the participant has understood the explanation. I have asked the participant whether they wish to take part in the study and they have given a clear indication that they are willing to take part and therefore I deem the participant to have given verbal consent to be interviewed.

Name of study team member (please print)	_____		
Signature	_____	Date	_____

[†] A member of the research team must provide the explanation of, and information concerning, the research project.

Withdrawal from participation in the interview

The participant has requested to withdraw from participating in an interview for this study

The participant has been asked and has indicated that he/she (choose one based on what the participant has reported):

Wishes to withdraw and not allow any interview responses to be used in this study

Wishes to withdraw but to allow data contributed so far to be used for this study

Did not state whether they wish to allow data contributed so far to be used

Name of Participant (please print)	
Participant number	
Date withdrawal was requested	
Name of study team member to whom withdrawal was requested	
Signature of study team member
