Flowchart of participants from recruitment to follow-up endpoint

t: time in months

^a Prevention programme was administered at the organisational and managerial levels

^b Loss to follow-up of only at employee level

^c Organisations declined to participate in the 24-month follow-up survey due to the COVID-19 pandemic

Baseline characteristics

Table 1. Descriptive statistics among managers at baseline (n=456)

Variables, n (%)	Control group (n=154)	p	Intervention group (n=302)
Gender ^a	(H=134)		(H-302)
Male	74 (48.1)	0.079	207 (68.5)
Female	50 (32.5)	0.075	95 (31.5)
Age ^a	30 (32.3)		75 (51.5)
≤ 34 years	23 (14.9)	0.177	57 (18.9)
35-44 years	67 (43.5)		97 (32.1)
45-54 years	43 (27.9)		105 (34.8)
≥ 55 years	19 (12.3)		39 (12.6)
Educational level ^a	, ,		, ,
Primary/upper secondary education	59 (38.3)	0.128	145 (48.0)
Tertiary education	91 (59.1)		150 (49.7)
Managerial responsibility for number of employees ^a			
General administrative management	6 (3.9)	0.000	61 (20.2)
1-10 employees	49 (31.8)		85 (28.1)
11-20 employees	28 (18.2)		47 (15.6)
21-50 employees	15 (9.7)		53 (17.5)
> 50 employees	51 (33.1)		50 (16.6)
Years in current position ^a			
< 1 year	35 (22.7)	0.010	42 (13.9)
1-4 years	70 (45.5)		121 (40.0)
≥ 5 years	46 (29.8)		134 (44.4)
Self-reported health ^a			
Less than good	25 (16.2)	0.425	51 (16.9)
Good	80 (51.9)		170 (56.3)
Very good	48 (31.2)		76 (25.2)
AUDIT score ^b , mean (s.d)	4.87 (2.99)	0.556	4.69 (2.79)
s d : standard deviation n: n-value			

s.d.: standard deviation. p: p-value

^aDifferences between the control and the intervention group was calculated using Pearson's chi-square test for categorical variables

^bDifferences between the control and the intervention group was calculated using one-way ANOVA for continuous variable

^{**}The total number of respondents in each column did not equate to the total number of participants in either the control or the intervention group due to internal missing values or invalid values.
