

oPtimising post-dischArge care pathways after acute paNcreatitis: evaluatiOn of health seRvice utilisAtion, outcoMes (PANORAMA)

PANORAMA WP5 HEALTHCARE PROFESSIONAL INFORMATION SHEET

Version 1.1, (11-May-2026)

Invitation to participate in a one-day workshop

We would like to invite you to take part in a one-day workshop as part of a research study sponsored by the University of Birmingham and funded by the National Institute of Health Research. Before you decide, it's important that you understand why the research is being done and what it would involve for you. Please take the time to read the following information carefully and discuss it with others if you wish. If there is anything that is not clear, or if you would like more information, please ask us.

What is the purpose of the study?

There is a lack of evidence regarding the post-discharge management of patients treated for acute pancreatitis (AP). Specifically, there is no guidance on who needs to be followed up early or routinely, what needs to be assessed during outpatient follow-up, and what information patients need after discharge. We have completed a project to find opportunities to improve care. We now want to bring patients, doctors, nurses, and others involved in the care of people with acute pancreatitis to help us work out what we should do with our findings.

Why have I been invited to take part?

You have been invited because you are involved in the care of patients with acute pancreatitis. We would like to ask your views on how to improve care in patients following discharge from hospital.

Who is eligible to take part?

People who have experience of acute pancreatitis as a patient or carer can take part. Surgeons, gastroenterologists, general practitioners, and other doctors involved in the care of people with pancreatitis, as well as nurses and allied health professionals can take part.

Do I have to take part?

No, taking part is entirely voluntary. If you agree to take part and later change your mind, you can withdraw (leave the study) at any point without giving a reason. To withdraw from the study, you can contact the study team to let them know of the withdrawal from the study.

What will happen to me if I decide to take part?

If you would like to take part, please complete an expression of interest online <<redcap link>> You will be asked to provide your name, whether you are a patient/carer or healthcare professional, contact details, and geographic region. This will help us to make sure that we capture a range of experiences from around the country. If you are eligible to take part, a member of the research team, will then contact you to answer any questions that you might have and to inform you of arrangements for the workshop. This will be held face to face in Birmingham. If you are not eligible to take part in the study, you will be informed using the contact details you have provided, after which your data will be deleted. If you have told us that you wish to be informed about the results of the study, we will keep your contact details until we can do that, after which they will be deleted.

Prior to the workshop you will be asked to electronically complete a consent form to agree to take part in the study.

At the workshop, we will share the findings of the study so far. We will ask participants to tell us how the findings reflect their experiences. We will also ask what we should do with the findings to improve care for people after acute pancreatitis. We will take notes during the meeting but will not share any identifiable data.

Are there any possible disadvantages or risks from taking part?

We do not anticipate any major disadvantages to taking part in this. Some people may find it distressing to take part. If so, participants are free to withdraw from the study and will be given details of potential support groups.

What are the possible benefits of taking part?

Taking part in the study will not benefit you directly but may help to improve care for patients with similar problems to you in the future.

Will I be reimbursed for taking part?

We will cover reasonable travel expenses to attend the one-day workshop, with the use of public transport being encouraged. For example, the cost of a standard class return fare on train to the University of Birmingham train station, long-distance return coach journeys and/ or local bus tickets.

How will we use information about you?

We will need to use information from you for this research project.

This information includes your:

- Name
- Contact details (telephone & e-mail)
- Demographics (healthcare professional role, region of practice)
- Anonymised quotes from the meeting

People will use this information to do the research or to check to make sure that the research is being done properly. People who do not need to know who you are will not be able to see your name or contact details. Your data will have a code number instead.

The University of Birmingham is the sponsor of this research.

The University of Birmingham is responsible for looking after your information. We will share your information related to this research project with the following types of organisations:

- Other Universities directly involved with PANORAMA (University of Newcastle upon Tyne)

We will keep all information about you safe and secure by:

- Restricting access to your information to just those who need to see it; typically the PANORAMA research team at your hospital and the study management team running the study. Sometimes the sponsor or regulatory bodies may wish to review conduct of a study and request access to data. These are the only groups outside the research team who may have direct access to the database.
- Your data is stored on a database at the University of Birmingham. This database is encrypted, and access requires personal passwords and two-factor authentication to take place.
- All activity on the database is logged, so we can see who has added and viewed your data.

International transfers

Your data will not be shared outside the UK.

How will we use information about you after the study ends?

- Once we have finished the study, we will keep some of the data so we can check the results. We will write our reports in a way that no-one can work out that you took part in the study.
- You have the right to ask us to access, remove, change or delete data we hold about you for the purposes of the study. You can also object to our processing of your data. We might not always be able to do this if it means we cannot use your data to do the research. If so, we will tell you why we cannot do this.

What are your choices about how your information is used?

You can stop being part of the study at any time, without giving a reason, but we will keep information about you that we already have. If you wish to withdraw before the workshop has taken place then your data will be deleted. We need to manage your records in specific ways for the research to be reliable. This means that we won't be able to let you see or change the data we hold about you.

Where can you find out more about how your information is used?

You can find out more about how we use your information

- our leaflet (<http://www.hra.nhs.uk/patientdataandresearch>)

- by asking one of the research team
- by sending an email to panorama-study@contacts.bham.ac.uk
- by ringing us on +44 (0)121 4159106
- the University's Data Protection Officer at dataprotection@contacts.bham.ac.uk

How have patients and the public been involved in this study?

Patients have been consulted on the design of this study and are involved in the management team.

Who has sponsored, insured reviewed and funded the study?

All research in the NHS is looked at by an independent group of people, called a Research Ethics Committee, to protect participants' interests. This study has been reviewed and given a favourable opinion by the XXXXX Research Ethics Committee (Ref: XX/XX/XX).

The study is funded by the NIHR (NIHR165210) and is sponsored and insured by the University of Birmingham.

The University of Birmingham has in place Clinical Trials indemnity coverage for this study which provides cover to the University for harm which comes about through the University's, or its staff's, negligence in relation to the design or management of the trial and may alternatively, and at the University's discretion provide cover for non-negligent harm to participants.

What if there is a problem during the study?

If you have any concerns or questions about this study, please discuss with a member of the research team in the first instance, contact details are available towards the end of this sheet.

If you remain unhappy with their reply and wish to make a complaint you can contact the Research Governance team at the University of Birmingham by contacting researchgovernance@bham.ac.uk.

If you wish to complain about how your information has been handled please contact the University of Birmingham's Data Protection officer via email: dataprotection@contacts.bham.ac.uk

What do I need to do now?

If you would like to take part in the workshop please enter this weblink into your internet browser
