**Information Sheet:**

**Study Title:** Effectiveness of Bracketless Orthodontic Technique (Coated E-Wires) for Treatment of Mild Crowding cases in Adults (A Randomized Controlled Trial)

**Researcher: Dr. Natalie Nabil Al-Qaisi**

**Supervisor: Prof. Dr. Rania Haddad**

- You are invited to participate in this research study, which will be conducted in the Department of Orthodontics and Dentofacial Orthopedics at the Faculty of Dentistry, University of Damascus. Before you decide whether to participate, it is important that you understand why the research is being conducted and what it will involve. Please take the time to read the following information carefully.
- This study aims to investigate the effectiveness of a modern technique called **bracketless fixed orthodontics** in reducing treatment duration and achieving the desired esthetic outcome in a sample of patients treated in the Orthodontics Department.
- The treatment will involve tooth alignment without the need for tooth extractions.
- The estimated number of participants in the study is 48 patients.
- All participating patients will undergo treatment entirely within the Orthodontics Department at the University of Damascus.
- Participation in this study is completely voluntary. If you decide to participate, you will be asked to sign a consent form. If you choose to withdraw at any point, you are free to do so without being bound by your prior consent or need to provide any reasons. This will not affect your treatment at the Orthodontics Department in any way.
