

## Invitation to Participate in a Research Study

You are invited to allow your child to participate in a research study conducted by the Department of Pediatric Dentistry at the Faculty of Dentistry, University of Damascus. Before you decide, it is important that you fully understand the purpose of the study and what participation involves. Please take a few moments to carefully read the following information.

### Study Purpose

The aim of this study is to evaluate the effectiveness of different types of crowns used on primary teeth. Specifically, the study will assess the clinical outcomes of four types of crowns placed after a pulpotomy procedure in primary molars.

### What the Study Involves

- **Local Anesthesia:** Will be administered to ensure a pain-free procedure.
- **Pulpotomy Procedure:** Removal of the infected portion of the dental pulp.
- **Crown Placement:** The treated tooth will be restored with one of the crowns being studied.
- **Follow-Up Appointments:** You and your child will be asked to return for clinical evaluations at 1, 6, and 12 months after the procedure to monitor treatment outcomes.

### Voluntary Participation

Participation in this study is entirely voluntary. You may choose to withdraw your child from the study at any time without any impact on your child's current or future dental care. You will have the opportunity to ask any questions and receive clear, complete answers before signing this consent form.

### Participant Consent

I have read and understood the information above. I voluntarily agree for my child to participate in this research study.
