Family and Community Medicine

### **PARTICIPANTS INFORMATION SHEETS**

You are invited to take part in a study exploring the effect of education program on overweight and obesity of primary school children in Sulaimai province. The aim of this study is to determine the relationship between body weight and some socio-demographical characteristics of children and their family, and to evaluate the body weight and associated factors in this group such as dietary habit, physical activity, socioeconomic status and other factors, as well as to find out the weight loss difference between intervention group and control group. Till now there is no data about this issue in Kurdistan Region-Iraq, for this reason this study is being carried out. Parents in this study will participate in two education session teen weeks' interval. Participation in this study is totally voluntary, and you are under no obligation to take part in this study. You are free to withdraw at any point of study duration, no risk from participating in the study and all data collected will be kept confidential and used for research purposes only. The consent forms will be kept separate from the questionnaires. Your name or any identifying characteristics will not be available to anyone at any point. If you have any questions you may contact us on: Tel No; 07725255124.

Thank you very much for your participation.
