Information sheet

Public title: Comparison of different treatments in the management of recurrent herpes labialis.

Prepared by the researcher: Mai Gaizeh Al-Hallak

Supervision: Assistant Professor Dr. Abeer Ahmad Al-Joujou / Co-supervisor: Assistant Professor Dr. Jamileh Ali Hsaian.

You are invited to participate in this study, which will be conducted in the Department of Oral Medicine at the Faculty of Dentistry at the University of Damascus, before you make your decision, you must know the reason for conducting this study and the procedures to be followed:

- This research aims to compare the effectiveness of acyclovir, low-power laser, photodynamic therapy, and olive leaf extract in the management of recurrent herpes labialis, and thus the possibility of finding an alternative to traditional drug treatment.
- Patients will be divided into four groups equally, and each group will undergo one of the above-mentioned treatments.

You have a complete choice to participate in this study. If you agree to participate, you will be asked to sign the informed consent. If you wish not to participate in the study, you have complete freedom.
