Study information

Scientific Title**Study objectives**

To list the clinical and cost-effectiveness of early post-placement intervention with adoptive parents looking after children placed from care.

Please note as of 03/12/2008 this record was updated to include the extension to the anticipated end date. This trial was initially planned to finish on the 31st March 2007.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Joint South London and Maudsley/Institute of Psychiatry Research Ethics Committee, Kings College London gave approval on the 15th March 2002 (ref: 036/02; 'Comparing types of support for adoptive families')

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Psycho-social problems of children adopted from care

Interventions

Intervention A:

Standard social work support service, plus 10 weekly sessions of a manualised home based cognitive behavioural intervention to enhance parenting.

Intervention B:

Standard social work support service, plus 10 weekly sessions of a manualised home based educational programme on child maltreatment and its consequences.

Intervention C:

Standard social work support service, plus Intervention A or B after nine months (when follow up extra interventions completed).

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Strengths and difficulties questionnaires (SDQ) and impact supplement. Outcomes were measured immediately post-intervention and again 6 months later.

Key secondary outcome(s)

1. Adoption problem check list
2. User satisfaction
3. Intervention-based assessment of parenting change
4. Daily hassles
5. Expression of feelings questionnaire
6. Teacher ratings of SDQ

Outcomes were measured immediately post-intervention and again 6 months later.

Completion date

31/12/2007

Eligibility**Key inclusion criteria**

Families who, within the past year, have had a child placed for adoption from local authority care.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Child

Sex

All

Key exclusion criteria

1. Placed children who have major physical or learning difficulties
2. Placed children not showing sufficient difficulties to warrant the intervention
3. Foster families becoming adopters

Date of first enrolment

01/11/2002

Date of final enrolment

31/12/2007
