# Study information

### Scientific Title
Online cognitive behavioural treatment of bulimia nervosa: a randomised controlled trial with a one-year follow-up

### Study objectives
In comparison to bibliotherapy and a waitlist, online (therapist-assisted) cognitive behaviour therapy is more effective in reducing bulimic symptoms.

### Ethics approval required
Old ethics approval format

### Ethics approval(s)
Study Review Board of the Department of Clinical Psychology of the University of Amsterdam approved in March 2006

### Study design
Single centre randomised controlled trial

### Primary study design
Interventional

### Secondary study design
Randomised controlled trial

### Study setting(s)
Other

### Study type(s)
Treatment

### Participant information sheet
Can be found at http://www.vn.nl/extra/pdf/Fact%20bulimia.pdf (Dutch only)

### Health condition(s) or problem(s) studied
Bulimia nervosa

### Interventions
The online treatment is a twenty-week program based on existing - evidence-based - treatment manuals, and incorporates cognitive behaviour therapy interventions such as psycho-education, self-monitoring, diet management, exposure, response prevention, cognitive restructuring, interventions promoting self-esteem and relapse prevention. These treatments were therapist-guided (therapist time: 7 to 14 hours).

Participants in the bibliotherapy group received a hard-copy of "Overcoming bulimia and binge eating", a Dutch self-help book for BN by Johan Vanderlinden, which is based on the same cognitive-behavioral principles as applied in the online treatment. Apart from an initial introductory e-mail with instructions how to use this book, no support was provided to participants in this group.

### Intervention Type
Other

### Phase
Not Applicable

### Primary outcome measure
Global severity of eating disorder symptoms and binging and purging frequency as measured by the Eating Disorder Examination Questionnaire (EDE-Q). Primary and secondary measures were administered at pretest, immediately after treatment (post-test), six weeks after treatment, and one year after treatment.

### Secondary outcome measures
Cognitive-attitudinal distortion in body experience, as measured by the Body Attitude Test (BAT). Primary and secondary measures were administered at pretest, immediately after treatment (post-test), six weeks after treatment, and one year after treatment.

### Overall study start date
01/07/2006

### Completion date
01/07/2008

## Eligibility

### Key inclusion criteria
1. Recurrent binging
2. Extreme weight-control behaviour (either in the form of purging as well as physical exercise)
3. Extreme concern with body shape and weight
4. Downloaded, signed, and returned an Informed Consent form
5. Aged greater than or equal to 16 years, either sex

### Participant type(s)
Patient

### Age group
Adult

### Sex
Both

### Target number of participants
105

### Total final enrolment
105

### Key exclusion criteria
1. Aged less than 16 years
2. Body mass index (BMI) less than 18 kg/m^2

3. Heightened risk of dissociation or psychosis
4. Suicidal ideation indicative of plans or a history of recent suicide attempts within the past 3 years
5. Drug and alcohol abuse
6. Use of neuroleptic medication or unstable dosages of other psychiatric medication
7. Concurrent psychotherapy, or indications that another psychological disorder was prevalent

Excluded respondents were referred to their GPs or to mental health centres in their vicinity.

### Date of first enrolment
01/07/2006

### Date of final enrolment
01/07/2008

## Locations

### Countries of recruitment
Netherlands

### Study participating centre

# Funder(s)

### Funder type
Research organisation

### Funder Name
The Dutch Innovation Fund of Collaborative Health Insurances (Innovatiefonds Zorgverzekeraars) (Netherlands) - awarded a grant to initiate the project

### Funder Name
Interapy PLC (Netherlands) - provided consultancy, technical assistance, web-application development and application hosting support

# Results and Publications

### Publication and dissemination plan
Not provided at time of registration

### Intention to publish date

### Individual participant data (IPD) sharing plan

### IPD sharing plan summary
Not provided at time of registration
