Study information

Scientific Title

An intervention to decrease sedentary behaviour in young adults at risk of type 2 diabetes: project STAND (sedentary time and diabetes)

Acronym DRN 465 (STAND)

Study objectives

An intervention to decrease sedentary behaviour in young adults at risk of Type 2 Diabetes Mellitus

Ethics approval required Old ethics approval format

Ethics approval(s) 10/H0403/13; First MREC approval date 07/05/2010

Study design Randomised interventional process of care

Primary study design Interventional

Secondary study design Randomised controlled trial

Study setting(s) Hospital

Study type(s) Treatment

Participant information sheet

Not available in web format, please use the contact details to request a patient information sheet

Health condition(s) or problem(s) studied

Topic: Diabetes Research Network, Primary Care Research Network for England; Subtopic: Type 2, Not Assigned; Disease: All Diseases, Education

Interventions

Structured education, based on the PREPARE and DESMOND programmes, with the aim of reducing sedentary behaviour. The structured education programme will incorporate movement technology to facilitate participant feedback and self-monitoring.

Intervention Type

8347

Behavioural

Primary outcome measure Reduced sedentary behaviour measured by an accelerometer at 12 months

Secondary outcome measures Not provided at the time of registration

Overall study start date 17/11/2010

Completion date 28/02/2013

Eligibility

Key inclusion criteria

 Age 18-40 years with a BMI >30 (>27.5 for South Asian participants) or age 18-40 years with a BMI >25 (>23 for South Asian participants) plus one additional risk factor:
 1. Family history of diabetes or cardiovascular disease (in a first degree relative)
 2.2. Previous gestational diabetes
 3. Polycystic ovarian syndrome
 4. HbA1c >5.8% or previous impaired glucose regulation

Participant type(s) Patient

Age group Adult

Lower age limit 18 Years

Upper age limit 40 Years

Sex

Both

Target number of participants

Planned Sample Size: 178; UK Sample Size: 178;

Key exclusion criteria

- 1. Physical condition which limits full participation in the study
- 2. Active psychotic illness or an significant illness which, in the view of the investigators, would prevent full participation
- 3. Steroid use
- 4. Inability to communicate in verbal and written English
- 5. Diabetes

Date of first enrolment 17/11/2010

Date of final enrolment 28/02/2013
