Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

GP practice

Study type(s)

Diagnostic

Participant information sheet

Health condition(s) or problem(s) studied

Peptic ulcer disease

Interventions

Educational outreach versus no education.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

The following outcomes will be measured retrospectively for the 6 months preceding and following the intervention in all practices:

1. GP prescriptions for antacids and ulcer healing drugs
2. Proportion of appropriate referrals for open access endoscopy (OAE)
3. Proportion of clinically significant findings at OAE

Secondary outcome measures

No secondary outcome measures

Overall study start date

01/01/1998

Completion date

01/07/1999

Eligibility

Key inclusion criteria

GP practices within Salford and Trafford Health Authority

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

114 general practices

Key exclusion criteria

Does not meet with inclusion criteria

Date of first enrolment

01/01/1998

Date of final enrolment

01/07/1999
