Participant information sheet

Health condition(s) or problem(s) studied

Colorectal disease

Interventions

This is a factorial study with four arms:

- 1. Interactive referral proforma: GP's could use an interactive referral document to make referrals to colorectal surgeons
- 2. Education outreach visit: an educational outreach visit from a surgeon
- 3. Both of the above
- 4. Neither of the above (control)

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

The primary outcome will be the proportion of patients with significant bowel disease who are referred.

Secondary outcome measures

Secondary outcomes will include the quality of GP referrals

Overall study start date
