Study information

Scientific Title

-

Study objectives

The study aims to compare between the effect of written information and a guided tour on anxiety levels in women attending the urodynamic clinics.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Urological and Genital Diseases

Interventions

Randomised controlled trial. Clinical Study, Human Physiology, Inpatient Admission, Multicentre Study: National, NHS Patients, Study of Non-Therapeutic Procedure.

Written information and a guided tour vs standard practice.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

The difference in STAI score between women in the intervention and control group.

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/12/2005

Eligibility

Key inclusion criteria

150 questionnaires will be given to all women attending the urodynamics clinic.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Female
