Study information

Scientific Title

Study objectives

To compare the package of the care for patients with minor injuries provided by nurse practitioners with that provided by junior doctors.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Ethical approval was obtained for the study from the local research ethics committee.

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Burns

Interventions

Care by junior doctor versus care by nurse practitioner

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Adequacy of care provided by the nurse practitioner or junior doctor.

Secondary outcome measures

1. Patient's satisfaction with the quality of their care
2. Improvement and return to usual activities
3. Need for unplanned follow-up

Overall study start date

10/02/1997

Completion date

04/08/1997

Eligibility

Key inclusion criteria

Patients presenting at accident and emergency department with minor injuries.

Participant type(s)

Patient

Age group

Not Specified

Sex
