Study information

Scientific Title

Study objectives

The study has a null hypothesis that acupressure does not affect the outcome of patients with nausea and vomiting in pregnancy as measured by objective indices.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Prospective single-blind randomised controlled trial

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Pregnancy and Childbirth: Nausea and vomiting

Interventions

Acupressure vs no acupressure

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s)

Not provided at time of registration

Completion date

01/07/2003

Eligibility**Key inclusion criteria**

120 patients will be recruited

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Female

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/12/2002

Date of final enrolment

01/07/2003

Locations**Countries of recruitment**
