Study information

Scientific Title

Development of novel magnetic resonance imaging (MRI) techniques for neurological applications

Study objectives

Quantitative magnetic resonance imaging (MRI) techniques may provide additional information in the understanding of several neurological and psychiatric disorders. The development of some of these techniques is still incomplete and the interpretation of results in pathology is thus limited. Scanning healthy subjects and analysing their data will help in making the scanning techniques suitable for clinical applications. This is an ongoing process of continual testing and optimisation.

Ethics approval required

Old ethics approval format

Ethics approval(s)

MREC, ref: 05/Q0502/101

Study design

Single-centre non-randomised observational diagnosis and screening study

Primary study design

Observational

Secondary study design

Non randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Screening

Participant information sheet

Not available in web format, please use contact details to request a participant information sheet

Health condition(s) or problem(s) studied

Topic: Neurological; Subtopic: Neurological (all Subtopics); Disease: Nervous system disorders

Interventions

Routine MRI examinations only provide qualitative images of the brain. Quantitative MRI techniques, such as MR spectroscopy (MRS), magnetisation transfer imaging (MTI), diffusion imaging (DI), perfusion imaging (PI) and relaxometry can be particularly useful in the investigation of the pathological substrate of several diseases. Their usefulness is well documented in the literature; however, their application is somehow limited by technical problems.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

1. Magnetic resonance imaging (MRI)
2. MR spectroscopy (MRS)
3. Magnetisation transfer imaging (MTI)
4. Diffusion imaging (DI)
5. Perfusion imaging (PI)

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/01/2006

Completion date

31/07/2009

Eligibility**Key inclusion criteria**

Not provided at time of registration
