Study design

Cluster randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

GP practice

Study type(s)

Treatment

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Cardiovascular: Heart failure

Interventions

Cluster-randomised controlled trial. Control arm patients receiving conventional HF treatment. Intervention group patients attend a specialised nurse clinic.

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

1. ECHO utilisation
2. Angiotensin convertin enzyme-inhibitor use
3. Readmission rates

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/06/2000

Completion date

31/08/2004

Eligibility

Key inclusion criteria

400 heart failure patients from nine practices on Merseyside and in Cheshire.

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

400

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

01/06/2000

Date of final enrolment

31/08/2004
