Study information

Scientific Title

Study objectives

Does self etching primer provide satisfactory clinical performance with similar failure rates compared to conventional etch?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Oral Health

Interventions

Randomised controlled trial: self-etching primer compared to conventional etch.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Percentage bond failure rate.

Key secondary outcome(s))

Not provided at time of registration.

Completion date

30/12/2006

Eligibility

Key inclusion criteria

Patients requiring fixed appliance treatment.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Patients who require bands or have heavily restored teeth.

Date of first enrolment

01/12/2003

Date of final enrolment

30/12/2006

Locations

Countries of recruitment

United Kingdom

England

Study participating centre Dept of Oral and Maxollofacial Surgery

Bury United Kingdom BL9 7TD
