# **Study information**

## **Scientific Title**

Effectiveness of a multi media self-help intervention for problem drinkers: the Teleac Course 'Drinking less, do it yourself!', a randomised controlled trial

## **Study objectives**

Compared to a waiting list control group, do participants who receive a multi media self-help program drink less standard units of alcohol a week?

## **Ethics approval required**

Old ethics approval format

## **Ethics approval(s)**

Approval received from the local ethics board (METIGG, chamber North, PO Box 86, 3500 AB Utrecht, The Netherlands) on the 22nd September 2006 (ref: CCMO registration number: NL13989.097.06; Research number: 6235).

## **Study design**

Randomised, controlled, parallel group trial

## **Primary study design**

Interventional

## **Secondary study design**

Randomised controlled trial

## **Study setting(s)**

Not specified

Quality of life

## **Participant information sheet**

## **Health condition(s) or problem(s) studied**

Problem drinking

## **Interventions**

The experimental group received the multichannel Teleac course Drinking less, do it yourself!. Its a cognitive behavioural self-help intervention to reduce alcohol consumption. The course consists of a course book (Drinking less: Lemmers et al, 2006), five television episodes of 25 minutes (Teleac/NOT, 2006) the self-help site MinderDrinken.nl (Riper E.A., 2002) and an informative site of Teleac: [www.teleac.nl/minderdrinken.nl](http://www.teleac.nl/minderdrinken.nl). The book has 190 pages and contains information, exercises and a diary to register alcohol intake. The television episodes follow the information in the five chapters of the book. Also two students are followed over time while they work through the course. A TV-coach gives advice.

The waiting list control group receives the intervention after the post-measurement (about eight weeks after baseline).

**Intervention Type**

Other

**Phase**

Not Specified

**Primary outcome measure**

Alcohol consumption a week measured in standard units (weekly recall). Measured after the intervention (T1) and three months later (T2) and at the same time for the waiting list control group.

Measurements:

1. T0: baseline (pre-intervention)
2. T1: 7 weeks after T0
3. T2: 3 months after T1

**Secondary outcome measures**

1. Alcohol related problems
2. Health care use
3. Quality of life

Measurements:

1. T0: baseline (pre-intervention)
2. T1: 7 weeks after T0
3. T2: 3 months after T1

**Overall study start date**

01/09/2006

**Completion date**

31/01/2007

**Eligibility****Key inclusion criteria**

1. Informed consent
2. Age of 18 years or older
3. Access to the internet
4. Availability of an e-mail address
5. Access to a DVD or video player

**Participant type(s)**

Patient

**Age group**

Adult

**Lower age limit**

18 Years

**Sex**

Not Specified

**Target number of participants**

200

**Total final enrolment**

181

**Key exclusion criteria**

1. Professional help for alcohol problems
2. Member of a self help group like Alcoholics Anonymous
3. Presently using alcohol medication
4. Involved in a study about alcohol
5. No alcohol consumption at baseline

**Date of first enrolment**

01/09/2006

**Date of final enrolment**

31/01/2007
