Study information

Scientific Title

Acronym

MRC COLPO Trial

Study objectives

To compare the cure rates in the two intervention groups. Additionally the two procedures will be compared in terms of perioperative morbidity, recovery time, incidence of postoperative voiding dysfunction, de novo detrusor instability and health economic costs to NHS and patient.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration.

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Stress incontinence

Interventions

The interventions under study will be open or laparoscopic colposuspension.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Primary Outcomes: complete cure of stress incontinence at 24 and 48 months. Symptom improvement classified as: Complete (have never leaked since surgery and no leakage objectively demonstrated), Acceptable Improvement (matched patient expectations), Inadequate Improvement, No improvement, Worse. Levels of significant operative morbidity.

Key secondary outcome(s)

Not provided at time of registration

Completion date

28/02/2006

Eligibility

Key inclusion criteria

1. Any woman for whom a decision has been made to perform a colposuspension for cystometrically proven genuine stress incontinence.
2. Women who have had an anterior colporrhaphy would be eligible as it is considered that their inclusion is pragmatic reflecting everyday practice.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

1. Women in whom bladder neck surgery is contraindicated;
2. Women with detrusor instability.
3. Women who have had previous retropubic bladder neck surgery (colposuspension or sling procedure) or sacrocolpopexy.
4. Women who are unhappy to be randomised to laparoscopic colposuspension.
5. Women considered too obese for open colposuspension. (Laparoscopic colposuspension is only to be available as part of the trial.)
