Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Other

Health condition(s) or problem(s) studied

Urinary incontinence

Interventions

The control group will be asked:

Do you ever leak any water (urine) when you don't mean to? Yes/No

The intervention group will be asked some related questions preceding the urinary incontinence question i.e.

1. Do you have to pass water (urine) at least once during the night? Yes/No
2. Do you have to pass water at least five times per day? Yes/No
3. Do you need to pass water when you hear running water? Yes/No
4. Do you sometimes have the sensation of not emptying your bladder after you have finished passing water? Yes/No
5. Do you get a sudden strong urge to pass water? Yes/No
6. Do you have difficulty in controlling your water? Yes/No
7. Do you ever leak any water when you don't mean to? Yes/No

Differences in the response rate between the two groups will be analysed for statistical significance.

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Information on the effect of leading questions on urinary incontinence.

Key secondary outcome(s)

The survey also contains questions relating to a range of health and lifestyle issues e.g smoking, alcohol use and diet.

Completion date

25/11/2005

Eligibility

Key inclusion criteria

1. Patients registered with Bury General Practitioners.
2. People over the age of 18.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 years

Sex

All

Key exclusion criteria

People under the age of 18.

Date of first enrolment

17/10/2005

Date of final enrolment

25/11/2005
