Study information

Scientific Title

Investigating the possible Therapeutic Effects of the Homoeopathic Remedy Apis Mellifica on Weaver Fish Stings using a Double Blind Randomised Controlled Trial

Acronym

Weaver-fish & Homoeopathy

Study objectives

That homoeopathic apis mellificia will be more effective in treating the sting from a weaver fish than a placebo

Ethics approval required

Old ethics approval format

Ethics approval(s)

Informed consent: understanding spoken and written english, over the age of eighteen, or with parental guidance and consent if under 18. There will be written informed consent from all participants or parents where needed. Informed of data protection, and possible adverse reactions to the homoeopathic remedy. Openness and honesty: Double blind test, thus the participant might be given a placebo although they will still receive the standard treatment. Right to withdraw. Protection from possible harm. Debriefing. Confidentiality and to follow all ethical principals of relevent professional bodies.

Study design

Double Blind Randomised Controlled Trial (RCT)

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Sting from weaver fish

Interventions

Standard treatment of feet submerged in hot water, plus homoeopathic remedy or placebo remedy

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Apis Mellifica

Primary outcome(s)

Pain relief

Key secondary outcome(s)

Removal of concomitant symptoms

Completion date

31/10/2006

Eligibility

Key inclusion criteria

Type 1, healthy clients, affected by weaver-fish sting, within one hour.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

All

Key exclusion criteria

1. Over 65 years of age
2. Unable to read english
3. Taking any prescribed medication
4. Not NHS registered
5. Have taken any previous form of treatment for the sting
6. Have been stung already this year
7. Any heart condition
8. Any other contraindications to treatment

Date of first enrolment

01/03/2006

Date of final enrolment

31/10/2006
