Study information

Scientific Title

Acronym

PEP-COMP

Study objectives

Not provided at time of registration

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Migraine

Interventions

Individualised acupuncture (up to 15 sessions) or 100 to 200 mg metoprolol

Intervention Type

Drug

Phase

Not Specified

Drug/device/biological/vaccine name(s)

Metoprolol

Primary outcome(s)

Not provided at time of registration

Key secondary outcome(s))

Not provided at time of registration

Completion date

31/01/2005

Eligibility

Key inclusion criteria

Adult patients with migraine fulfilling the criteria of the International Headache Society (planned number of participants was 480; recruitment had to be terminated early, in summer 2004, due to recruitment problems and time limits of the project after recruiting 115 patients)

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

All

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/10/2002

Date of final enrolment

31/01/2005

Locations

Countries of recruitment

Germany

Study participating centre Centre for Complementary Medicine Research

Munich Germany 80801
