UHLPRE01

Study information

Scientific Title
Prevention of diabetes using structured education and continuous support programme in those with pre-diabetes in a multi-ethnic population

Acronym
PREVENTION

Study objectives
Structured education and continuous support programme reduce the incidence of diabetes in a multi-ethnic population with pre-diabetes.

Ethics approval required
Old ethics approval format

Ethics approval(s)
Not provided at time of registration

Study design
Parallel controlled cluster randomised trial

Primary study design
Interventional

Secondary study design
Cluster randomised trial

Study setting(s)
GP practice

Study type(s)
Prevention

Participant information sheet
Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied
Pre-diabetes

Interventions
Intervention arm:
Six hours of education within one month of diagnosis, either as one full day, two half days, or 4 x 2 hours (delivered with interpreters for participants whose first language is not english); follow-

up will be for three years with clinical assessments at 6, 12, 24, 23 months. Continuous support will be regular telephone contact, website and additional written material.

Control arm:
Standard care as per national guidelines currently general lifestyle advice and written material follow-up will be for three years with clinical assessments at 6, 12, 24, 23 months.

Intervention Type
Behavioural

Primary outcome measure
Reduction in the incidence of diabetes at three years

Secondary outcome measures
1. Reduction in cardiovascular disease (CVD) risk (assessed using the current Framingham risk equation, standard for CVD risk assessment for General Practice in the UK), measured at baseline and 6, 12, 24, 23 months
2. Reduction in HbA1c, fasting and two-hour glucose, measured at baseline and 6, 12, 24, 23 months

Overall study start date
01/09/2008

Completion date
31/12/2012

Eligibility

Key inclusion criteria
1. Aged 40 - 70 years (if White European)
2. Aged 25 - 70 years (if South Asian)
3. Able to attend group education sessions

Participant type(s)
All

Age group
Adult

Sex
Both

Target number of participants
816

Key exclusion criteria
1. Unable to give informed consent
2. Diagnosis of diabetes

Date of first enrolment

01/09/2008

Date of final enrolment
31/12/2012
