# Study information

#### Scientific Title

#### **Study objectives**

Failure to attend pre-arranged outpatient appointments represents a failed opportunity to engage those with mental health problems, and a waste of NHS resources. Text based prompts (such as reminder letters) have been proposed as a simple, easy to deliver and cost effective means of addressing this problem - and are recommended in the recent National Health Service Framework for mental health.

To establish the effects of the National Service Framework recommended simple text based prompts on attendance of people due to be seen at psychiatric outpatients clinics in Leeds.

## Ethics approval required

Old ethics approval format

#### Ethics approval(s)

Not provided at time of registration

#### Study design

Randomised controlled trial

#### Primary study design

Interventional

## Secondary study design

Randomised controlled trial

## Study setting(s)

Not specified

## Study type(s)

**Not Specified** 

## Participant information sheet

## Health condition(s) or problem(s) studied

Mental and Behavioural Disorders

#### **Interventions**

Text based prompts vs no text based prompts

#### Intervention Type

Other

#### Phase

**Not Specified** 

#### Primary outcome measure

Not provided at time of registration

#### Secondary outcome measures

Not provided at time of registration

#### Overall study start date

01/12/2002

#### Completion date

01/12/2006

# **Eligibility**

#### Key inclusion criteria

Adults of working age in an inner city combined mental health and community trust. Every person due to attend a routine consultant led general psychiatric outpatient clinic for the first time between January 2003 and December 2003.

#### Participant type(s)

Patient

#### Age group

Adult

#### Sex

**Not Specified** 

#### Target number of participants

Not provided at time of registration

#### Key exclusion criteria

Not provided at time of registration

#### Date of first enrolment

01/12/2002

#### Date of final enrolment

01/12/2006
