Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Tobacco addiction

Interventions

Provision of a 4 hour central course for whole practice teams, patient-mediated monitoring and feedback of the provision of cessation advice, patient education materials and a task organisation protocol for the various members of the dental team.

The dental teams in the control group deliver usual care.

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Patient-reported number of smoking cessation advice given by the dental team, patients' smoking status and quit attempts.

Secondary outcome measures

Professionals' attitudes towards smoking and smoking cessation support, their knowledge of health consequences of smoking tobacco (especially dental health), patients' perspectives of smoking cessation.

Support by dentists will be measured as well as self-efficacy to provide smoking cessation support.

Overall study start date

01/01/2006

Completion date

01/11/2008

Eligibility**Key inclusion criteria**

Smoking patients visiting dental practices.

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

1300

Key exclusion criteria

Patients under the age of 18.

Date of first enrolment

01/01/2006

Date of final enrolment

01/11/2008
