Study information

Scientific Title
Expanded safety and acceptability study of 6% cellulose sulphate

Study objectives

Local tolerance and acceptability of cellulose sulphate (CS) gel applied vaginally twice daily for seven days.

Ethics approval required
Old ethics approval format

Ethics approval(s)
The study protocol was approved by scientific and ethics review committees at each implementing centre and the World Health Organization.

Study design
A phase I randomised, closed label, comparative study

Primary study design
Interventional

Study type(s)
Treatment

Health condition(s) or problem(s) studied
Sexually transmitted infection (STI) prevention

Interventions
1. Test groups using Cellulose Sulphate (CS) gel with or without concurrent intercourse
2. Control groups using K-Y jelly with or without concurrent intercourse

Total duration of involvement in the study, including screening, admission, completion and follow up, is approximately one month per subject.

Intervention Type
Drug

Phase
Phase I

Drug/device/biological/vaccine name(s)
Cellulose sulphate (CS) gel

Primary outcome(s)
The number of women who experienced any signs and/or symptoms of genital irritation as reported by volunteers at any time during follow-up or as determined by naked eye examination of the genitalia, on colposcopy or microbiologic tests.

Key secondary outcome(s))
Adverse events

Completion date
01/07/2003

Eligibility

Key inclusion criteria
1. Healthy, sexually abstinent and sexually active women
2. Considered to be at low risk for human immunodeficiency virus (HIV)
3. Recruited from family planning clinics and local communities in Kampala (Uganda), Mumbai (India), and Sagamu (Nigeria)
4. Aged between 18 and 50 years
5. Had regular menstrual cycles, or were on injectable contraceptives and amenorrhoeic for at least 6 months
6. Were not at risk for pregnancy (because of tubal ligation, steroidal contraceptives, or abstinence)
7. Willing to adhere to the study protocol

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Lower age limit
18 years

Sex
Female

Total final enrolment
180

Key exclusion criteria
1. Known to have an allergy to any component of CS gel or K-Y Jelly or condoms (cohort II only)
2. Currently pregnant or within 2 months from last pregnancy outcome
3. Known to abuse drug or alcohol
4. Had evidence of an infection with Trichomonas vaginalis, Candidiasis or bacterial vaginosis which did not resolve with treatment or if they had gonorrhoea or a chlamydial infection
5. Had a history of herpes or condylomata within the past 6 months
6. Had non-iatrogenic abnormal colposcopy findings involving deep disruption of the genital epithelium at enrolment

Date of first enrolment
01/12/2001

Date of final enrolment
01/07/2003
