## Additional identifiers

### Protocol serial number

ESPAC-1

## Study information

### Scientific Title

### Study objectives

Not provided at time of registration

**Ethics approval required**

Old ethics approval format

**Ethics approval(s)**

Not provided at time of registration

**Study design**

Randomised controlled trial

**Primary study design**

Interventional

**Study type(s)**

Treatment

**Health condition(s) or problem(s) studied**

Cancer of pancreas

**Interventions**

All patients undergo surgical resection followed by randomisation to one of four treatment arms:

1. Arm A: Radiotherapy, a split course of 40 Gy with a 2 week separation between each 20 Gy segment. Each 20 Gy segment to be given in 2 Gy fractions over 2 weeks. Chemotherapy with 5-fluorouracil to be administered intravenously on each of the first 3 days of each 20 Gy segment of radiotherapy.
2. Arm B: Systemic therapy with folinic acid followed by 5-fluorouracil to be given on 5 consecutive days every 28 days for six cycles
3. Arm C: Radiotherapy, a split course of 40 Gy with a 2 week separation between each 20 Gy segment. Each 20 Gy segment to be given in 2 Gy fractions over 2 weeks. Radiotherapy to be followed by systemic therapy with folinic acid and 5-fluorouracil to be given on 5 consecutive days every 28 days for six cycles.
4. Arm D: Control, no further treatment

**Intervention Type**

Drug

**Phase**

Not Specified

**Drug/device/biological/vaccine name(s)**

Adjuvant therapy

**Primary outcome(s)**

Not provided at time of registration

**Key secondary outcome(s))**

Not provided at time of registration

**Completion date**

20/04/2000

# Eligibility

## Key inclusion criteria

1. Histologically proven adenocarcinoma of the pancreas, macroscopically resected. (Patients with pancreatic cystadenocarcinoma and endocrine tumours, tumours of the pancreas and tumours of the duodenum, ampulla of Vater and lower common bile duct are excluded).
2. No evidence of ascites, metastases to the liver, spread to other distant abdominal organs, peritoneal or omental seedlings, or distant metastases
3. Fully recovered from the operation, fit to take part in the trial and life expectancy of more than 3 months
4. No previous or concurrent malignancy diagnosed, except basal cell carcinoma of skin or carcinoma in situ of cervix
5. No serious medical or psychological condition precluding adjuvant treatment

## Participant type(s)

Patient

## Healthy volunteers allowed

No

## Age group

Not Specified

## Sex

## Key exclusion criteria

Not provided at time of registration

## Date of first enrolment

01/01/1995

## Date of final enrolment

20/04/2000
