United Kingdom  
WC1N 3JH

## Additional identifiers

EudraCT/CTIS number

IRAS number

ClinicalTrials.gov number

**Secondary identifying numbers**  
N0012154291

## Study information

## Scientific Title

### Study objectives

Is Multi-Slice CT Scanning Superior to Both Bronchoscopy for Bronchography in the Management of Tracheobronchomalacia?

### Ethics approval required

Old ethics approval format

### Ethics approval(s)

Not provided at time of registration

### Study design

Randomised controlled trial

### Primary study design

Interventional

### Secondary study design

Randomised controlled trial

### Study setting(s)

Not specified

### Study type(s)

Not Specified

### Participant information sheet

### Health condition(s) or problem(s) studied

Respiratory: Tracheobronchomalacia

### Interventions

- A. Multi slice scanning
- B. Bronchoscopy

### Intervention Type

Other

### Phase

Not Specified

### Primary outcome measure

The current methods that are used in the management of tracheobronchomalacia are relatively invasive. CT is another way can be used in this patient group. We would like to compare it with the current more invasive standard techniques.

### Secondary outcome measures

Not provided at time of registration

**Overall study start date**

01/04/2004

**Completion date**

31/03/2006

## Eligibility

**Key inclusion criteria**

Children with Airway Narrowing

**Participant type(s)**

Patient

**Age group**

Child

**Sex**

Not Specified

**Target number of participants**

100

**Key exclusion criteria**

Not provided at time of registration

**Date of first enrolment**

01/04/2004

**Date of final enrolment**

31/03/2006

## Locations

**Countries of recruitment**

England

United Kingdom

**Study participating centre****Radiology**
