Study type(s)

Not Specified

Participant information sheet

Health condition(s) or problem(s) studied

Respiratory: Tracheobronchomalacia

Interventions

- A. Multi slice scanning
- B. Bronchoscopy

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

The current methods that are used in the management of tracheobronchomalacia are relatively invasive. CT is another way can be used in this patient group. We would like to compare it with the current more invasive standard techniques.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/04/2004

Completion date

31/03/2006

Eligibility

Key inclusion criteria

Children with Airway Narrowing

Participant type(s)

Patient

Age group

Child

Sex

Not Specified

Target number of participants

100

Key exclusion criteria
