Study information

Scientific Title

Study objectives

Effect on ventricular modelling of angioplasty and stenting of the occluded infarct related artery (IRA) among patients with their first Q wave anterior myocardial infarction.

Ethics approval required

Old ethics approval format

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Cardiovascular disease

Interventions

Angiography and angioplasty carried out within 28 days of the acute event. Patients to be randomised into intervention or non-intervention groups.

Patients with TIMI grade II or III in the IRA or multi-vessel disease will be excluded.

Remaining patients with TIMI grade 0 or I will be randomised to intervention plus optimal medical therapy or optimal medical therapy alone.
