Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Musculoskeletal injury

Interventions

1. Patients will receive care via the standard physiotherapy appointment system
2. Patients will be seen in an emergency department based physiotherapy clinic

Intervention Type

Other

Phase

Not Applicable

Primary outcome measure

1. Clinical effectiveness
2. Cost effectiveness

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/08/1998

Completion date

01/08/2000

Eligibility**Key inclusion criteria**

Adult patients suffering from soft tissue injuries of the ankle, neck and knee

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

Not provided at time of registration

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

01/08/1998

Date of final enrolment

01/08/2000

Locations**Countries of recruitment**

England

United Kingdom

Study participating centre

Central Manchester Healthcare NHS Trust
Manchester
United Kingdom
M13 9WL
