Study information

Scientific Title

Study objectives

To examine the effects of a supervised exercise program in patients with MS

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Quality of life

Health condition(s) or problem(s) studied

Multiple sclerosis (MS)

Interventions

Patients are randomised to:

- 1. Supervised exercise program
- 2. Care as usual

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

- 1. Health related quality of life
- 2. Physical function
- 3. Expanded Disability Status Scale (EDSS)
- 4. Immune function

Key secondary outcome(s))

No secondary outcome measures

Completion date

31/03/2006

Eligibility

Key inclusion criteria

50 adult MS patients

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/04/2005

Date of final enrolment

31/03/2006

Locations

Countries of recruitment
