Study information

Scientific Title

User's Assessment of the Comfort and Usability of a Chair Specifically Designed to meet the Physiological Needs of Stroke Patients when Seated versus the Standard Hospital Chair: a Pilot Study

Study objectives

A User's Assessment of the Comfort and Usability of a Chair Specifically Designed to meet the Physiological Needs of Stroke Patients when Seated versus the Standard Hospital Chair: a Pilot Study

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Pilot randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Quality of life

Participant information sheet

Health condition(s) or problem(s) studied

Cardiovascular: Stroke

Interventions

Specifically designed chair versus standard hospital chair

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Improved recovery of stroke patients

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/04/2004

Completion date

01/04/2006

Eligibility

Key inclusion criteria

Stroke patients admitted to Eastbourne District General Hospital

Participant type(s)

Patient

Age group

Adult

Sex

Both

Target number of participants

Not provided at time of registration

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/04/2004

Date of final enrolment

01/04/2006

Locations

Countries of recruitment

England

United Kingdom

Study participating centre

Eastbourne District General Hospital

Eastbourne
