Study information

Scientific Title

Genetic and psychometric role in post-surgical acute pain using ASL/regional cerebral blood (rCBF) flow

Study objectives
Key research questions include: to assess if functional magnetic resonance imaging (fMRI) changes correlate with patient's expressed dental pain (Visual Analogue Scale [VAS]); and to identify what genes are associated with human pain expression and behaviour in acute post-surgical pain in man.

Ethics approval required
Old ethics approval format

Ethics approval(s)
ref: 07/H0808/115

Study design
Multicentre non-randomised observational diagnosis and screening study

Primary study design
Observational

Study type(s)
Screening

Health condition(s) or problem(s) studied
Topic: Oral and Gastrointestinal; Subtopic: Oral and Gastrointestinal (all Subtopics); Disease: Oral & Dental

Interventions
Surgery is undertaken along with MRI scanning and blood tests and psychometric tests.

Intervention Type
Other

Phase
Not Applicable

Primary outcome(s)
Whole brain resting state distribution of Cerebral Blood Flow (rCBF) using continuous labelled ASL with multi-shot fast spin echo (FSE).

Key secondary outcome(s))
1. Cognitive Coping Strategizing Inventory (CCSI) index
2. Center for Epidemiologic Studies Depression Scale (CES-D) score
3. Computerised Visual Analogue Scale (VAS) measures of perceived intensity of post-surgical pain
4. DNA chip analysis blood
5. DNA chip analysis tissue
6. Eysenck Personality Questionnaire - revised version (EPQ-R) 'E (Extraversion)' and 'N (Neuroticism or Emotionality)' scores
7. Immunohistochemical analysis of known pain receptors

8. Schedule for Clinical Assessment in Neuropsychiatry (SCAN) score
9. The Symptom Checklist-90 - Revised (SCL-90-R) score
10. Students' Test Anxiety Questionnaire (STAQ) pre- and post-trait anxiety and state anxiety score
11. Surgical outcome (difficulty score [1 - 4 scale], depth of impaction, surgery time)

Completion date
01/03/2012

Eligibility

Key inclusion criteria
Not provided at time of registration

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Not Specified

Sex
Not Specified

Key exclusion criteria
Not provided at time of registration

Date of first enrolment
01/11/2007

Date of final enrolment
19/11/2008

Locations

Countries of recruitment
United Kingdom

England

Study participating centre
King's College London Dental Institute
