Study information

Scientific Title

Genetic and psychometric role in post-surgical acute pain using ASL/regional cerebral blood (rCBF) flow

Study objectives

Key research questions include: to assess if functional magnetic resonance imaging (fMRI) changes correlate with patient's expressed dental pain (Visual Analogue Scale [VAS]); and to identify what genes are associated with human pain expression and behaviour in acute post-surgical pain in man.

Ethics approval required

Old ethics approval format

Ethics approval(s)

ref: 07/H0808/115

Study design

Multicentre non-randomised observational diagnosis and screening study

Primary study design

Observational

Study type(s)

Screening

Health condition(s) or problem(s) studied

Topic: Oral and Gastrointestinal; Subtopic: Oral and Gastrointestinal (all Subtopics); Disease: Oral & Dental

Interventions

Surgery is undertaken along with MRI scanning and blood tests and psychometric tests.

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Whole brain resting state distribution of Cerebral Blood Flow (rCBF) using continuous labelled ASL with multi-shot fast spin echo (FSE).

Key secondary outcome(s))

- 1. Cognitive Coping Strategizing Inventory (CCSI) index
- 2. Center for Epidemiologic Studies Depression Scale (CES-D) score
- 3. Computerised Visual Analogue Scale (VAS) measures of perceived intensity of post-surgical pain
- 4. DNA chip analysis blood
- 5. DNA chip analysis tissue
- 6. Eysenck Personality Questionnaire revised version (EPQ-R) 'E (Extraversion)' and 'N (Neuroticism or Emotionality)' scores
- 7. Immunohistochemical analysis of known pain receptors

- 8. Schedule for Clinical Assessment in Neuropsychiatry (SCAN) score
- 9. The Symptom Checklist-90 Revised (SCL-90-R) score
- 10. Students' Test Anxiety Questionnaire (STAQ) pre- and post-trait anxiety and state anxiety score
- 11. Surgical outcome (difficulty score [1 4 scale], depth of impaction, surgery time)

Completion date

01/03/2012

Eligibility

Key inclusion criteria

Not provided at time of registration

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/11/2007

Date of final enrolment

19/11/2008
