Study information

Scientific Title
Using fiberoptic nasendoscopy with patients with voice disorders

Study objectives

Does the use of fiberoptic nasendoscopy enhance the effectiveness and efficiency of treatment for patients with voice disorders.

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Ear, nose and throat diseases

Interventions

Not provided at time of registration

Intervention Type

Other

Phase

Not Specified

Primary outcome(s)

Multi-dimensional voice quality outcomes: including patient opinion and clinician-based subjective and objective measurements.

Key secondary outcome(s))

Not provided at time of registration

Completion date

03/01/2002

Eligibility**Key inclusion criteria**

Non-organic dysphonia patients (number = 200)

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Does not match inclusion criteria

Date of first enrolment

03/01/1999

Date of final enrolment

03/01/2002

Locations
