Study information

Scientific Title

Study objectives

Is one regime more effective than the other in terms of function and complication rates?

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Two arm randomised intervention, experimental prospective longitudinal study

Primary study design

Interventional

Study type(s)

Not Specified

Health condition(s) or problem(s) studied

Surgery: Hemiarthroplasty

Interventions

1. Early mobilisation
2. Late mobilisation

Intervention Type

Procedure/Surgery

Phase

Not Specified

Primary outcome(s)

Constant shoulder score, complication rates

Key secondary outcome(s))

Not provided at time of registration

Completion date

01/02/2004

Eligibility

Key inclusion criteria

Volunteers post fracture of shoulder.

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Not Specified

Sex

Not Specified

Key exclusion criteria

Not provided at time of registration

Date of first enrolment

01/08/2002

Date of final enrolment

01/02/2004
