Treatment

Participant information sheet

Not available in web format, please use the contact details to request a patient information sheet

Health condition(s) or problem(s) studied

Dementia

Interventions

Randomised double-blind placebo-controlled trial

Intervention Type

Supplement

Primary outcome measure

Improvements in mood, cognition, quality of life on the functioning measures MMSE, QOL-AD, GHQ-12, CIBIC and neuropsychological battery subjects.

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/09/2004

Completion date

31/03/2005

Eligibility

Key inclusion criteria

50 outpatient attendees at a Memory Clinic with a diagnosis of dementia (MMSE score 17-24)

Participant type(s)

Patient

Age group

Senior

Sex

Both

Target number of participants

50

Key exclusion criteria

Does not meet inclusion criteria
