Study information

Scientific Title
An investigation of the Hospital Elder Life Program (HELP) system of care to prevent delirium: a qualitative case study

Study objectives
Design:
Case studies in three hospitals

Objectives:
1. Review and adapt the Hospital Elder Life Program (HELP) for use in the UK
2. Identify strategies to support the implementation of HELP
3. Determine the optimum methods to deliver HELP in routine care

Ethics approval required
Old ethics approval format

Ethics approval(s)
Bradford Research Ethics Committee, 26/01/2010, ref: 09/H1302/117

Study design
Observational qualitative case study

Primary study design
Observational

Study type(s)
Prevention

Health condition(s) or problem(s) studied
Topic: Generic Health Relevance and Cross Cutting Themes; Subtopic: Generic Health Relevance (all Subtopics); Disease: Health Services Research

Interventions
Qualitative investigation with NHS staff, hospital volunteers, patient and carer representatives including three, two-hour facilitated workshops in three hospital sites, individual interviews and focus groups. Three workshops in each of the three hospital sites will be undertaken over 12 - 18 months.

Intervention Type
Other

Phase
Not Applicable

Primary outcome(s)
Qualitative investigation

Key secondary outcome(s))
No secondary outcome measures

Completion date
30/11/2012

Eligibility

Key inclusion criteria
Participants in the study will be NHS staff, hospital volunteers, and patient and/or carer representatives. Following discussion with relevant managers and clinicians, HELP development teams will be set up in three hospitals. Eight to ten staff and others having a potential interest /role in the programme (e.g. senior manager, senior doctor, matron, nurse consultant and/or specialist nurse, staff nurse, therapist, manager of the volunteer service, volunteer, patient representative, care assistant and ward clerk) will be approached for participation. Additionally, a number of other clinical staff and volunteers will be approached for interview and focus group participation.

Target Gender: Male and female
Lower Age Limit: 18 years

Participant type(s)
Patient

Healthy volunteers allowed
No

Age group
Adult

Lower age limit
18 years

Sex
All

Key exclusion criteria
Does not meet inclusion criteria

Date of first enrolment
01/12/2009

Date of final enrolment
30/11/2012
