Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Hospital

Study type(s)

Treatment

Participant information sheet

Health condition(s) or problem(s) studied

Atopic dermatitis

Interventions

Questionnaire; Randomised controlled trial. Random allocation to:

1. Treatment A - oral antibiotics
2. Treatment B - bathing in potassium permanganate

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Quality of life during and after the trial measured by the Children's Dermatitis Quality of Life Index

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/05/2003

Completion date

01/11/2003

Eligibility

Key inclusion criteria

Patients will be recruited from St James's University Hospital (SJUH) and Leeds General Infirmary (LGI) Outpatients Dermatology Clinic who has infected eczema (age range 3 months to 16 years)

Participant type(s)

Patient

Age group

Child

Lower age limit

3 Months

Upper age limit

16 Years

Sex

Both
