Study information

Scientific Title
Cost-effectiveness and surgical outcomes of laparoscopic Roux-en-Y gastric bypass in one Asia center: a retrospective study

Study objectives

To evaluate the cost-effectiveness and surgical outcome of laparoscopic Roux-en-Y gastric bypass in one Asia Center.

Ethics approval required

Old ethics approval format

Ethics approval(s)

E-Da Institution Review Board approved on the 18th April 2008 (ref: EMRP097019)

Study design

Retrospective observational non-randomised study

Primary study design

Observational

Study type(s)

Treatment

Health condition(s) or problem(s) studied

Morbid obesity

Interventions

Patients received laparoscopic Roux-en-Y gastric bypass surgery. Duration of follow up will be at least 3 years for all the patients after surgery.

Intervention Type

Other

Phase

Not Applicable

Primary outcome(s)

Measured immediately during hospitalisation and discharge:

1. Operation time
2. Surgical complication
3. Hospital stay
4. Hospital fee

Key secondary outcome(s)

1. Excess weight loss at 1st, 3rd, 6th, 9th and 12th month after surgery
2. Long term complication, measured for 3 years follow-up
3. Vitamin and nutrition deficiency, measured for 3 years follow-up

Completion date

31/12/2011

Eligibility**Key inclusion criteria**

1. Aged 18 - 65 years, either sex
2. Morbid obesity
3. Receiving laparoscopic Roux-en-Y gastric bypass

Participant type(s)

Patient

Healthy volunteers allowed

No

Age group

Adult

Lower age limit

18 years

Sex

All

Key exclusion criteria

1. Substance abuse
2. Psychiatric illness

Date of first enrolment

01/08/2004

Date of final enrolment

31/12/2011
