Study information

Scientific Title

Micronutrients and Immunity in Elderly Patients

Study objectives

1. To study the relationship between certain nutrients in the blood, immunity against infection and susceptibility to infections in older people
2. To generate data to enable us to apply for external funding for the main study

Ethics approval required

Old ethics approval format

Ethics approval(s)

Not provided at time of registration

Study design

Randomised controlled trial

Primary study design

Interventional

Secondary study design

Randomised controlled trial

Study setting(s)

Not specified

Study type(s)

Not Specified

Participant information sheet

Not available in web format, please use the contact details below to request a patient information sheet

Health condition(s) or problem(s) studied

Nutritional, Metabolic, Endocrine

Interventions

Micronutrients versus no micronutrients

Intervention Type

Other

Phase

Not Specified

Primary outcome measure

Micronutrient status, oxidative stress, degree of inflammation, innate and adaptive immune responses, nutritional status (anthropometric and biochemical measures)

Secondary outcome measures

Not provided at time of registration

Overall study start date

01/03/2005

Completion date

30/09/2007

Eligibility

Key inclusion criteria

20 septic and 20 non-septic patients, aged 65 years and over

Participant type(s)

Patient

Age group

Senior

Sex

Both

Target number of participants

20 septic and 20 non-septic patients

Key exclusion criteria

Patients in coma, patients diagnosed with malignancy, patients diagnosed with severe medical or psychiatric illness, patients with bleeding disorders, patients taking micronutrient supplements, anticonvulsants or antifolate drugs.

Date of first enrolment

01/03/2005

Date of final enrolment

30/09/2007
