Anorexia nervosa (AN)

Interventions

CD ROM group: The computerised intervention for carers of people with anorexia nervosa has been developed in the SLAM Eating Disorders Unit. This CD-ROM contains 9 interactive modules, which teach carers disease- and self-management skills. It includes information on how to communicate with the young person about their AN, how to support them at meal times to facilitate weight gain and re-establish healthy eating, how to manage crises and conflict, how to assess and manage risk, information on the use of the mental health act, how to address the carers' own needs, how to work with NHS and voluntary services and the role of different practitioners in the Eating Disorders team.

EDA support group: Informal support will be accessed from the EDA (EDA-support) via their helplines and carer support groups where available.
